Reasons for allowance

1. This communication is in response to applicant's 01/10/2005 amendment in the application of Cain et al. for a "System, device, and method for receiver access control in a multicast communication system" filed 09/13/2000. The proposed amendments has been entered and made of record. Claims 1, 16, 27, 41 and 55-61 have been canceled per applicant's request, and claims 517, 25, 29, 43, 49 have been amended. The claims have been amended to include the allowable subject matter set forth in the office action mailed on 10/18/2004.
2. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings filed 09/13/2000 are informal drawings. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.
3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
4. The application has been amended as follows:

IN THE CLAIMS:

I. Cancel the withdrawn claims 62-80.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Claims 5, 2-4, 6-15 and 18, 17, 19-26 and 29; 28, 30-40 and 43, 42, 44-54 are allowable as evident by applicant's amendment (Claims are renumbered as 1-50 respectively)

7. The following is an examiner's statement of reasons for allowance: The closest prior art of record fails to disclose or suggest wherein the policy service logic is operably coupled to send a policy service request message to the policy server indicating at least the multicast group and receive a policy service decision message from the policy server indicating whether the subscriber device can be admitted to the multicast group, as specifically recited in the claims. The instant invention, in combination with the other claimed features, improves upon the Prior Art by providing a method and system for policy server and access control in multicast communication system.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
